Annexure-I Technical specifications and other details for Fabrication of folding extension for working platform with Hylam sheet.

Figure 1: Existing working platform around INTF vessel

The above figure shows the existing working platform for INTF vessel in ITER India.

The proposal is to fill the gap between current working platform and INTF vessel with the help of foldable structure with hylam sheet, support angle and foldable hinge. Thus, scope is to fabricate the foldable structure with the help of angle support and hinge with high to support the hylam sheet. The hylam sheet is proposed to be bolted to the angle structure which will can be foldable. The proposed configuration of fabrication is shown in figure 1. The periphery of support structure needs to be fabricated with about 40 such segments around the vessel. This will act as a fall arrester and safety.
